Semiconductor Process Gases

Quality Statement

Metaloids...

Commits to achieve quality and consistency with a competitive edge.

Commits to reduce variations in product mixes through continuous quality management built on proven quality control systems in production, product packaging and gas-blending.

Pays attention to details whereby all processes are documented and monitored to manage interruptions and ensure high yields. Our total quality program includes broader employee participation, quality control on raw materials and lead time assessments.

Delivers total quality to customer. At Metaloids, we believe total quality should dictate the pace in every department and the Metaloids brand should deliver high performance to engineered metalloid devices.

Fosters mutually beneficial partnerships with suppliers, distributors and end-users.
